

FIG. 1

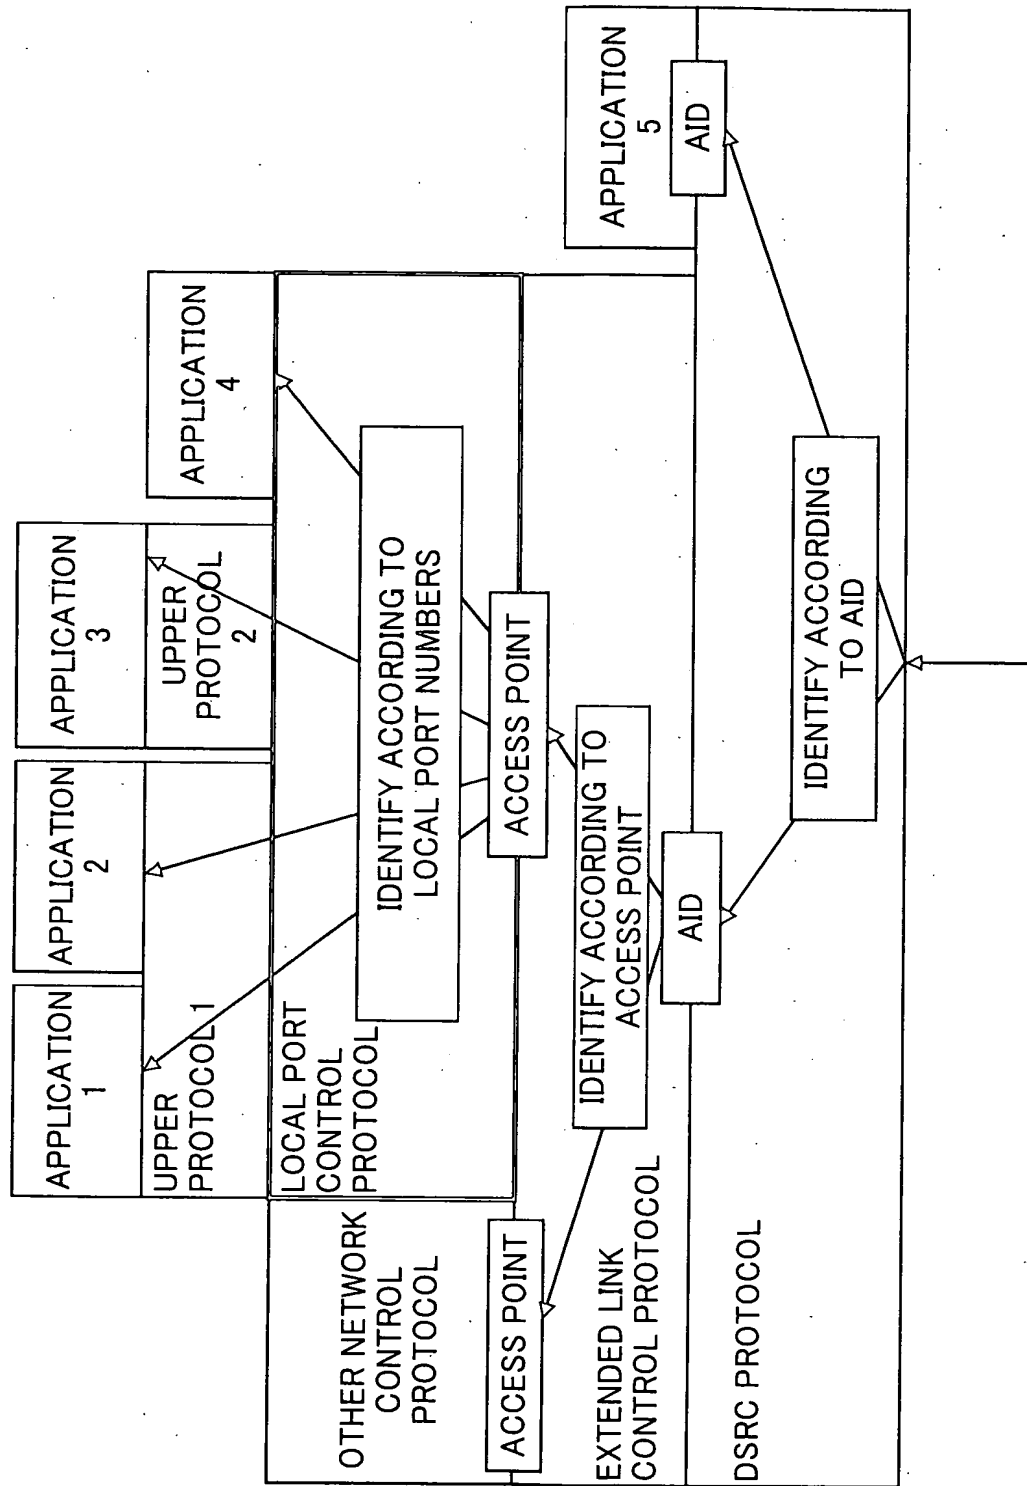

FIG. 2

LOCAL PORT NO.	APPLICATION	REMARKS
0	UNUSED	
1 TO 0x07FF	SAME AS DEFINITION OF UDP PORT NUMBER	SAME AS PORT ASSIGNMENT FOR UDP APPLICATION SPECIFIED IN RFC 1700
0x0800	UNUSED	
0x0801	DEFAULT NCP	RECEIVING PORT FOR BASE STATION APPLICATION IN TAG-TYPE TERMINAL
0x0802	ECHO	RECEIVING PORT FOR ECHO SERVICE
0x0803	ECHO REPLY	RECEIVING PORT FOR REPLY TO ECHO
0x0804 TO 0x0807	RESERVED FOR ID NOTIFICATION APPLICATION	RECEIVING PORT FOR APPLICATION IMPLEMENTING ID NOTIFICATION SERVICE FOR TERMINALS OTHER THAN TAG-TYPE TERMINAL
0x0808 TO 0x080F	RESERVED FOR PUSH-TYPE DELIVERY APPLICATION	RECEIVING PORT FOR APPLICATION PROVIDING PUSH-TYPE INFORMATION
0x0810 TO 0x085F	RESERVED FOR CHARGING/PAYMENT	RECEIVING PORT FOR APPLICATION IMPLEMENTING CHARGING SERVICE
0x0851 TO 0x0FFE	RESERVED FOR DSRC NON-NETWORK-TYPE APPLICATION	
0x0FFF	LOCAL PORT PROTOCOL MANAGEMENT SERVICE	RECEIVING PORT FOR LOCAL PORT PROTOCOL MANAGEMENT SERVICE
0x1000 TO 0xFFFF	ARBITRARY PORT	

FIG. 3

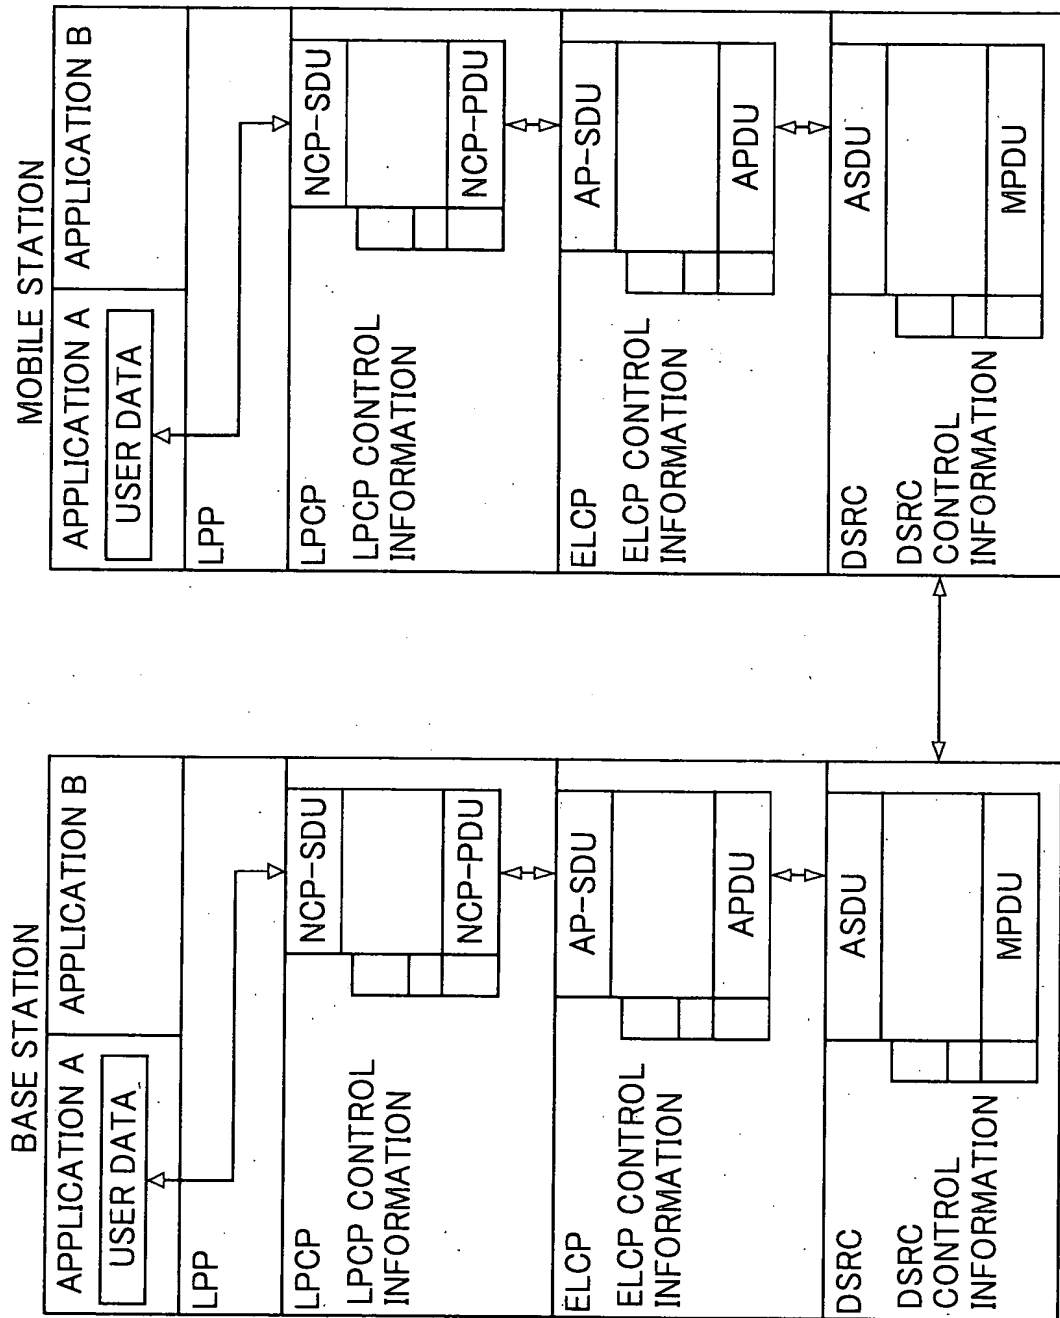

FIG. 4

PRIMITIVE TYPE	ABBREVIATION	DESCRIPTION
REQUEST	REQ	USED WHEN AN UPPER LAYER REQUESTS A SERVICE FROM A LOWER LAYER.
INDICATION	IND	USED WHEN A LOWER LAYER NOTIFIES AN UPPER LAYER OF A SERVICE FROM THE COUNTERPART.

FIG. 5

SYMBOL	DESCRIPTION
M (MANDATORY)	MANDATORY PARAMETER
O (OPTIONAL)	OPTIONAL PARAMETER
(=)	INDICATES THAT THE PARAMETER VALUE IS EQUIVALENT TO THE VALUE OF THE IMMEDIATELY PRECEDING PRIMITIVE ("REQ" IN THE CASE OF "IND").

FIG. 38

ABORT CODE	CODE	DESCRIPTION
UNKNOWN	0x00	-
PROTOCOL ERROR	0x01	THE RECEIVED PDU STRUCTURE IS ABNORMAL.
TID IS INVALID.	0x02	THE TID IS INVALID.
TRANSACTION SERVICE IS NOT SUPPORTED.	0x03	THE RECEIVER DOES NOT SUPPORT THE REQUEST-RESPONSE TYPE TRANSACTION SERVICE.
LPP VERSION IS DIFFERENT.	0x04	THE LPP VERSION IS DIFFERENT BETWEEN THE SENDER AND THE RECEIVER.
RECEIVE BUFFER OVERFLOW	0x05	THE RECEIVE BUFFER HAS OVERFLOWED.
MTU ERROR	0x06	BECAUSE THE SEND DATA EXCEEDED THE MTU IN THE LPCP, THE TRANSACTION COULD NOT BE STARTED (WHEN SEGMENTATION/RE-ASSEMBLY PROCESSING IS NOT SUPPORTED).
RESEND TIMER TIMEOUT	0x07	THE RESEND TIMER EXPIRED, AND THE TRANSACTION WAS ABORTED.
RESULT TIMER TIMEOUT	0x08	THE RESULT TIMER EXPIRED, AND THE TRANSACTION WAS ABORTED.
LINK ADDRESS ERROR	0x09	(POINT TO POINT) THE VEHICLE IS NOT PRESENT INSIDE THE ZONE. (BROADCAST) THE BROADCAST ADDRESS IS ILLEGAL.
DESTINATION PORT ERROR	0x0A	THE DESTINATION PORT NUMBER IS NOT PRESENT IN THE COUNTERPART.
LPP IS NOT SUPPORTED.	0x0B	THE DSRC-ASL DOES NOT SUPPORT THIS PROTOCOL.
ABORTED BY DSRC-ASL.	0x0C	BECAUSE THERE WAS NO SPACE IN THE SEND QUEUE IN THE DSRC-ASL, THE REQUESTED SERVICE WAS ABORTED.
TRANSACTION WAS NOT STARTED.	0x0D	BECAUSE THE NUMBER OF TRANSACTIONS EXCEEDED THE NUMBER WHICH CAN BE EXECUTED AT THE SAME TIME, THE TRANSACTION COULD NOT BE STARTED.
UNDER SEGMENTATION/ASSEMBLY PROCESSING	0x0E	A TRANSACTION USED SEGMENTATION/RE-ASSEMBLY PROCESSING IS BEING EXECUTED.
RESERVED	0x0F TO 0xFF	RESERVED

```

The diagram shows the following sequence of events:

- The Mobile Station (MS) sends a **REGISTER PORT PORT=1** message to the Base Station (BS) via the **APP (PORT=1)** interface.
- The BS sends an **OPEN PORT.REQ OPEN PORT=1 PRIMITIVE TYPE=0** message to the **LPP** interface.
- The LPP sends an **EVENT REPORT.IND** message to the **LPCP** interface, containing **EVENT CODE =DSRC CONNECTION NOTIFICATION (96)** and **EXTENSION PARAMETER =User Profile**.
- The LPCP sends a **MAKE UP OF CONNECTION MANAGEMENT TABLE** message to the **CONNECT.CNF** interface.
- The BS sends a **CONNECT.CNF LID=link Address ACCEPT PORT=0** message to the **APP (PORT=1)** interface.
- The MS sends an **INVOKE.REQ DEST PORT=2** message to the BS via the **APP (PORT=1)** interface.
- The BS sends a **TRANSFER DATA.REQ** message to the **LPP** interface.
- The LPP sends an **EVENT REPORT.IND** message to the **LPCP** interface, containing **EVENT CODE=129** and **EXTENSION PARAMETER=3**.
- The LPCP sends a **TRANSFER DATA.IND** message to the **ABORT.IND** interface.
- The BS sends an **ABORT.IND** message to the **APP (PORT=1)** interface.
